

# KORRIDOR INFORMATION DAY

for EU scientific officers, Korean NCPs and programme managers and  
researchers:

**“Access opportunities for European researchers in Korean RTD programmes”**

## 1. Background

Korea is one of the most important RTD partners of the EU with well established legal frameworks for cooperation. However, the level of public awareness of cooperation opportunities for European researchers in Korean RTD programmes is still very low. Thus, the EU FP7 KORRIDOR (Stimulating and facilitating the participation of European researchers in Korean R&D programmes) project (Dec. 2009 - Nov. 2011) aims to widen and strengthen the RTD cooperation between Korea and the EU in common research areas of interest by opening up access opportunities for European researchers in Korean national research and innovation programmes, facilitating joint research initiatives supported by the Korean side and contributing to the improvement of the cooperation climate between Europe and Korea.

## 2. Aims of the event

- To inform participants of opportunities for Europeans in Korean RTD programmes
- To introduce the ACCESS4EU programme, especially the KORRIDOR project
- To gather feedback from participants on the policy paper (1st version)
- To share expectations from European scientific officers and researchers on the KORRIDOR project and on S&T cooperation between Korea and their country
- To facilitate partner search and consortia building and provide consulting and advice
